### EXPERIENCE

#### Reown, Remote — Web Developer

NOV 2023 - PRESENT

- Brought Figma mockups to life as visually stunning and user-friendly web interfaces, prioritizing pixel-perfect design and cross-browser compatibility.
- Leveraged APIs to establish seamless communication between front-end interfaces and back-end services, crafting dynamic functionalities with JavaScript and React for a truly engaging user experience.

#### Swift Medi-Spark, Remote — Frontend Developer

AUG 2022 - JAN 2023

- Built a React application showcasing hospitals using the company's EMR with seamless RESTful API integration. Maintained site quality through bug fixes.
- Achieved a 10% performance gain for the EMR system by removing redundant code and improving the user interface for a smoother experience.

#### Zuri X I4G, Remote — Frontend Developer

MAY 2022 - AUG 2022

- Demonstrated a results-oriented approach, exceeding project requirements with innovative front-end solutions. Consistently delivered on time by streamlining tasks.
- I actively expanded my skillset by researching and mastering programming languages recommended by senior developers.
